DYNACORD® COBRA™ – A SONIC SUCCESS STORY HEARD AROUND THE WORLD.

Two festivals held at different corners of the Earth had two things in common: first-class sound and the Dynacord® Cobra™ System.

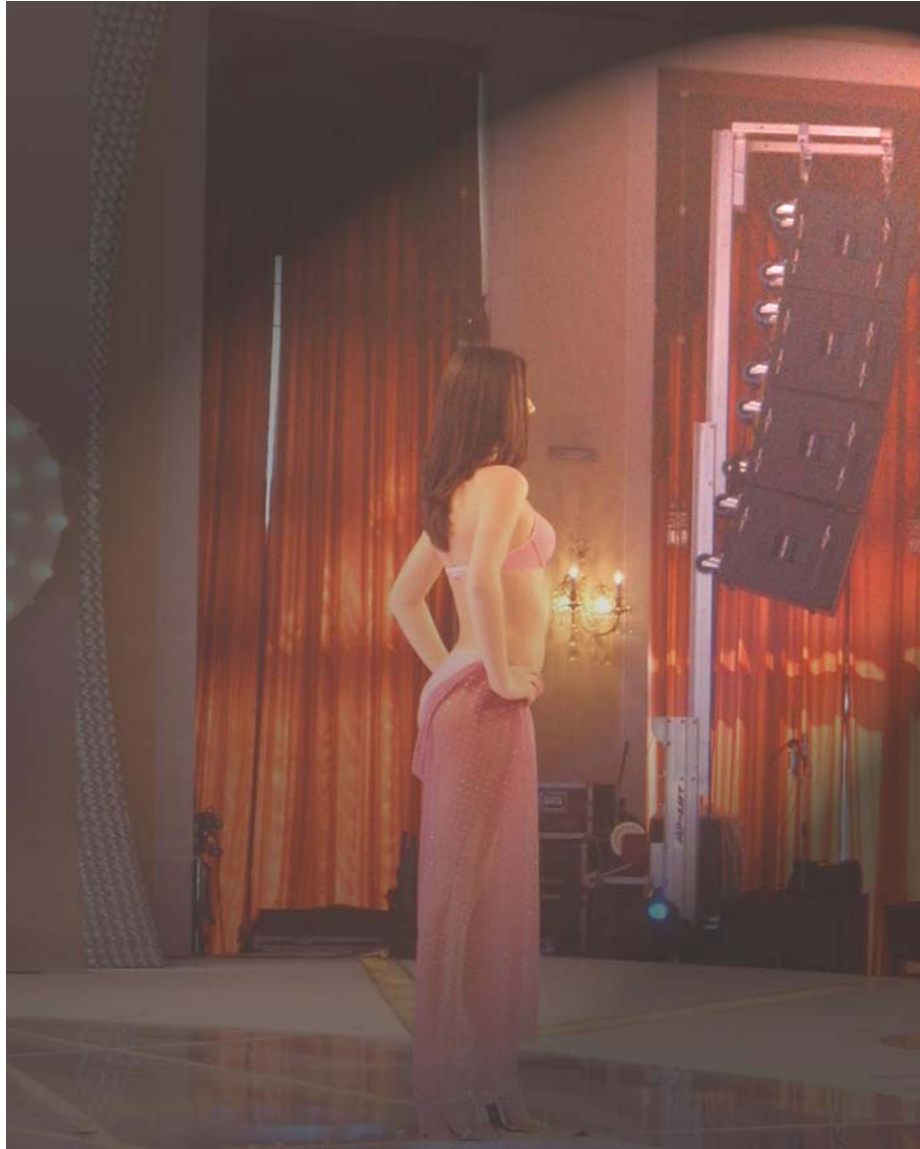

Fashionable, but tricky from a sound reinforcement standpoint: the "Christal Hall" at the Kvarner Hotel in Opatija, Croatia.

Straubing, Germany (April 30, 2004): Almost the entire rock, pop and rap scene of Dubai, Sharjah and Abu Dhabi took part in the Revolution Festival on the 18th March at the Nashwan Hall in Dubai, where over 600 music fans listened to 14 live acts. NMK Electronics Ent. Were responsible for the sound, with equipment from EVI Audio forming the centrepiece of their production. NMK used a Dynacord Cobra 2 PA, EV Sx300 monitors and a MIDAS Venice 320 console – a setup that really impressed the event's organizer, Kiran Sequeira: "The sound of the Cobra was simply fantastic. Even at the highest volume levels there was not the slightest feedback." FOH man Milton Kyvernitis summed up the sound reinforcement: "Extremely professional! The Venice and the Cobra proved to be an amazing team." (For more information, see www.nmkelectronics.com).

In another corner of the world, the same PA system was employed with similar success: The Croatian Radio and TV Festival (*see photos below*) ran from the 9th to the 20th March 2004, with sound production in the hands of local company Mr Pink. It was a prestigious but tricky commission. For one thing, over 50 of the most important national acts were performing; for another, the acoustic conditions in the 'Christal Hall' of the high-class Kvarner hotel – a venue much in vogue at the moment – were extremely critical, requiring up to 60 stage

microphones at times. Zoran Hügl, Managing Director of Mr Pink, commented: "In this hall, which presents really extreme problems from the standpoint of sound reinforcement, the Cobra was absolutely brilliant. We used two Cobra 2 hangs and EV Sx300 monitors, much to the delight of the performers." A key role was also played by Klark Teknik® Eqs and controllers (DN27, KT1248). Despite the great length of the festival and the complex demands of the commission, at the end of the events Zoran Hügl was happy to report: "We didn't experience a single technical problem throughout the entire two weeks."

Beautiful Space, Beautiful Sound, Beautiful Performers
