

DYNACORD® COBRA™ SYSTEM INSTALLED IN ROMANIA'S LARGEST CONCERT HALL

Bucharest, Romania (June 18th): The Sala Palatului in Bucharest is not only Romania's largest concert hall; it is also the one with the best sound. The secret? A newly-installed Dynacord ®Cobra-4™ compact line-array system. The Sala Palatului has a capacity of around 3,000 seats and a history that includes some of the most illustrious names in 20th century music. Architecturally the Sala Palatului harks back to the days of Communism, but the managers of Romania's largest concert hall are looking only to the future — a fact made clear with their choice of sound system. Gerom International, with support from EVI Audio partners HSA Audio S.R.C, installed a Dynacord Cobra-4 line array system as the sound reinforcement centrepiece at the theater.

The acoustic upgrade included the following components:

- (2) hangs of 6 Dynacord Cobra-4 Top/Far units per side
- (2) stacks of four Dynacord Cobra PWH subs per side
- (8) Dynacord MX12 front fills
- (10) Dynacord L2400 power amps
- (3) Dynacord DSP-244 processors

Pro Audio Group
EV • Telex • Midas • Klark Teknik
Dynacord • RTS • University Sound

(2) Dynacord AM-12 monitors
(2) Dynacord V12-60P central clusters
Various Electro-Voice microphones

The first concerts in the newly equipped Sala Palatului, including highlights of the world famous George Enescu Festival, proved the wisdom of investing in Dynacord. George Cristea, head of HSA Audio S.R.C. commented: "The system installed previously was not only inadequate for the acoustic demands of such a major venue, but also far too cumbersome and unsightly. The Cobra's compact dimensions allow everyone a perfect view of the stage, as well as delivering unbeatable sound. Many people came up to me after the première and told me they'd never known the sound in the hall to be even remotely as good."
