

ELECTRO-VOICE® LAUNCHES EVID™ 12.1P POWERED SUBWOOFER SYSTEM AT INFOCOMM

ORLANDO, FLORIDA (June 3, 2003): Electro-Voice® is showing its new 12-inch powered subwoofer system at this year's INFOCOMM, Booth #534, 635. The new EVID 12.1P Powered Subwoofer System was specially engineered to complement the EVID line of full-range loudspeakers. Designed to meet the needs of professional sound contractors, the 12.1P is ideal for supplementing the bass response of any EVID model in an indoor application. It is particularly useful in sports bars, dance floors, retail environments, health clubs, restaurants, etc. The 12.1P adds the extra dimension of a powerful low end where foreground music is desired. Its 650 watts of dynamic power and 126 dB maximum SPL is enough to satisfy any music requirement when used with EVID surface mount speakers.

The 12.1P's unique design allows for flexible mounting and placement while delivering the smoothest bass response possible. Reinforced steel-fastener construction and the low profile bracket allow for a variety of wall, corner and ceiling mounting configurations. Features also include an adjustable 12dB/octave crossover, full range and high pass line level XLR pass thru outputs and all mounting hardware.

The 12.1P is available in black or white, and can easily be painted to match any decor.
