

EV (ELECTRO-VOICE®) LAUNCHES SbA750 COMPACT POWERED SUBWOOFER AT INFOCOMM

SbA750 Adds Additional Sound Solutions to EV's Line of Powered Loudspeaker Systems

ORLANDO, FLORIDA (June 3, 2003): EV (Electro-Voice®) is introducing the SbA750 compact powered subwoofer, one of two new additions to its line of powered loudspeakers, at this year's INFOCOMM, Booth #534, 635.

The SbA750 is a powered subwoofer with XLR in, high pass out, integrated pole-mount, 5m PowerCon lead and rugged Futura™ exterior for long-life. The SbA750 is designed to complement EV's powered loudspeakers the SxA100+ and SxA250, as well as the passive cabinets Sx300 and Sx100+ driven by powered mixers like the Dynacord® PowerMate™ series. The SbA750 provides plenty of thump on the bottom end; the frequency response is 45 – 150 Hz. Perfect for markets that demand portability and versatility, yet need a full sound at even the lowest play levels. The SbA750 – especially when coupled to the SxA100+ or SxA250 – is the perfect solution for live music, DJ and A/V applications.

The state-of-the art class H power amplifier module delivers 750 watts RMS power to an EV DL15Y 15" woofer. The audio performance and the reliability features of the amplifier are derived from the famous EV Precision Series of power amplifiers.

The SbA750's patented LPN (Low Pass Notch) filter compensates for transient distortion in dynamic signal and the built-in PowerMax™ stereo crossover filter achieve a much higher output than expected from a compact cabinet of this size.
