

## FORMULA ONE GALA USES ELECTRO-VOICE® SOUND REINFORCEMENT

**Copenhagen, Denmark/Straubing, Germany (November 26, 2003):** Under the watchful eye of its patron, Prince Joachim of Denmark, and 20,000 motor racing fans, the fourth Historic Grand Prix was staged in Copenhagen's Faelled Park at the beginning of last August. An Electro-Voice sound system held its own against the deafening roar of souped-up 12-cylinder engines. This was an exciting and in every respect 'historic' spectacle, in being both the first time Formula One cars have penetrated the center of Copenhagen, and because the drivers included such legends as five-time Le Mans winner Tom Kristensen.

To compete against the screaming cars and cheering crowds, the audio system needed a few horsepower of its own. Sound and Light, the firm responsible for the sound reinforcement, wisely opted for Electro-Voice sound reinforcement. Together with ASCON, EVI Audio's partner in Denmark, Sound and Light's technicians opted for a rig based around (30) EV Sx300 enclosures and (20) EV P2000 amps (see equipment list below). This provided perfect coverage for the thousand-meter course. Helge Stensballe of ASCON commented: "The race commentary was perfectly intelligible the entire length
