

## ELECTRO-VOICE® SHOWS POLARCHOICE™ SATELLITE MICROPHONE AT NSCA

*The Polar Choice® Satellite Brings the Benefits of Wireless to the Boardroom, Conference Center, or Podium*

**LAS VEGAS, NV (March 19, 2004):** Electro-Voice® is proud to show the PolarChoice™ Satellite microphone at this year's NSCA, Booth #2715 and demo room S-233. Simply, the PolarChoice Satellite brings the benefits of wireless to the boardroom, conference center, or podium.

The PolarChoice Satellite is a free-standing gooseneck style microphone, firmly anchored in place by a base that features a unique, contemporary design. This low-profile foundation hides PolarChoice Satellite's most powerful feature – space for a wireless transmitter. Turn the base over to reveal the specially designed compartment for housing a Telex® or Electro-Voice bodypack transmitter. Connect the microphone to the bodypack, set-up the wireless channel, and place PC Satellite anywhere an easy-to-use microphone is required. No longer do you have to cut holes in tables, run long cables, or compromise the architectural integrity of an installation. With the PolarChoice Satellite, anything is possible.

### PolarChoice Satellite features include:

- Free-standing weighted base for reliable stability
- Accepts Telex & Electro-Voice bodypack transmitters (RE-1, RE-2, FMR-1000, FMR-500 & SAFE 1000)
- Easy to use on/off mic switch
- High visibility blue LED clearly displays mic status to the user
- Exceptional sound quality with EV's proven PolarChoice design
- Selectable polar pattern to easily adapt to any situation. Choose between omni, cardioid, supercardioid or hypercardioid
- Available in three gooseneck lengths: 18", 12" or 5"

Telex /EV transmitters fit easily and snugly into place

Programmability & changing batteries are facilitated without removal of transmitter from the satellite base
