

## TELEX® RADIOCOM™ BTR-1 ENCRYPTED WIRELESS INTERCOMM INTRODUCED AT INFOCOMM 2004

**ATLANTA, GA (June 9, 2004):** Telex® will be introducing the Radiocom™ BTR-1 series of UHF Frequency Agile Encrypted Intercoms at this year's InfoComm, Booth #2545, the Sidney J. Marcus Auditorium, and Ballroom #A311.

Building on the technology and success of the Telex SAFE-1000 line of encrypted wideband wireless microphones, the Telex BTR-1 provides wide band full duplex secure communications. The units also employ Telex's proprietary ClearScan™ function for unmatched ease of frequency selection.

Employing a 32-bit linear feedback shift register for encryption, the units provide secure communications while meeting export controls to allow their use worldwide. Early adopters of the BTR-1 include professional football teams and broadcast rental houses.

BTR-1 units are ideal for any sensitive or high profile production, where the need to guard against eavesdropping is important. The encryption technology is firmware-based allowing future upgrades as new developments are made in encryption algorithms.

Telex® and RTS™ are professional audio brands of Telex Communications, Inc., a leader in the design, manufacture and marketing of sophisticated audio, wireless,

multimedia, aircraft, broadcast and communications equipment for commercial, professional and industrial customers. Telex Communications markets its products in more than 80 countries under the brands EV®, Telex®, RTS®, Dynacord®, Midas®, Klark Teknik®, University® and others.
