

UK ROCK CLUB OPTS FOR AN ALL-ELECTRO-VOICE® PA

Harlow, UK (February 27, 2004): For the last 17 years, the Square in Harlow has taught its young musicians the gospel of rock 'n' roll according to Electro-Voice. This year, the leading rock school in Essex, South East England, has taken the plunge and bought a new front-of-house system for its 300-plus live venue: a QRx system from EV.

Chris Gillam (L) and Dan Moriarty on stage at The Square

The Square is funded by Essex County Council's Youth Service to provide musical education for young people between the ages of 13-19, and to host live music events. Three nights a week, up and coming local acts play live at the Square, as well as touring acts from further afield.

Technical team leader Dan Moriarty, who installed the Square's new EV QRx system, purchased from the Wembley PA Centre, is delighted with the results: "We've got QRx 112/75s left and right of the stage, and another pair in a center cluster, supported by MTL1X subs on either side. The system is run by Electro-Voice DX38 processing."

Moriarty continued: "Intelligibility used to be a problem in this room, but the QRx system has cleared up our phase problems and given us a lot more low-

end definition. This is the first time we've had 18" drivers in the venue, and everyone agrees it sounds great."

EV's QRx Series is a popular choice for high-quality permanent installations, offering premium Electro-Voice components in an ultra-linear and highly flexible package. The asymmetric and fully rotatable CD horn allows the QRx112/75, and the other models in the range, to be flown horizontally or vertically; they can also be used as floor monitors.
