

EV® (ELECTRO-VOICE®) INTRODUCES XLD/XS Dolly for Transport of XLD/XS Products

Anaheim, California (January 19, 2005): EV® (Electro-Voice®) is proud to introduce another solution for its line array products, the XLD/XS Dolly, which eases transport of XLD281/XS212 professional loudspeakers.

XLD/XS Dolly

The new XLD/XS dolly allows easy transport of Electro-Voice® XLD281/XS212 professional loudspeakers by providing previously unavailable solutions for stacking various numbers of the company's X-Line Very Compact products.

The number of speakers used in the dolly system falls on the customer, depending on the versatility required. In the XLD/XS dolly up to 6 XLD281 or 3 XS212 speakers can be stacked per side, for a total of 12 XLD281 or 6 XS212 speakers.

To switch from XLD281 stacks to XS212 stacks, customers simply remove the XLD281 5-degree wedges at the top and bottom of the dolly.

For more protection, SP8.4 and SP12.6 side-panel kits are available. These provide protection of all rigging/pins during real-world transport.

The SP8.4 allows a total of (8) XLD281 or (4) XS212 stacked. The SP12.6 allows a total of (12) XLD281 or (6) XS212 stacked.
